7000 Series ELECTRO-HYDRAULIC SURGICAL TABLES

7000 Series

The Excellent Balance

Dr. MAX

7000 Series ELECTRO-HYDRAULIC SURGICAL TABLES

The exceptional design, high quality, and engineering excellence of our Dr. MAX 7000 series surgical tables satisfy not only customers' expected reliability, performance, safety and value but also offer instant, almost unlimited articulations.

CHARACTERISTICS

Built-in Kidney Bridge

is radiolucent and designed for flexibility in kidney position or Thorax surgery.
(Option "K")

Manual Override

located on the base that enables full use of the table in the event of power or built-in battery failure.

(Option "P")

Functions:

Table up / down ,	Floor lock / unlock ,
Tilt left / right ,	Trend / Rev. trend ,
Back up / down ,	Slide to head / to foot.

Adjusting Leg Section via Gas Spring

Two piece (split) design, foldable and detachable via gas spring. (Option "D")

Battery the Power supply also works with the DC battery powered system to supply about 80-100 operations during a power outage.

(Option "B")

X-RAY TOP

allows for inserting X-ray film cassette from the head, foot, or either side for a full range (from head to foot) of exposure angles.
(Optional accessory)

Foot Control

provides hand free and water-proof manipulation in tabletop up/down, Trendelenburg/reverse Trendelenburg, and longitudinal slide toward foot/head (or lateral tilt) positioning.
(Optional accessory)

Extendable Head Rest

provides 60mm (2.4") of extension for extended radiographic coverage or special procedures.

Tabletop Longitudinal Slide

facilitates full-body fluoroscopic imaging (7000S/SK/SF/SKF only).

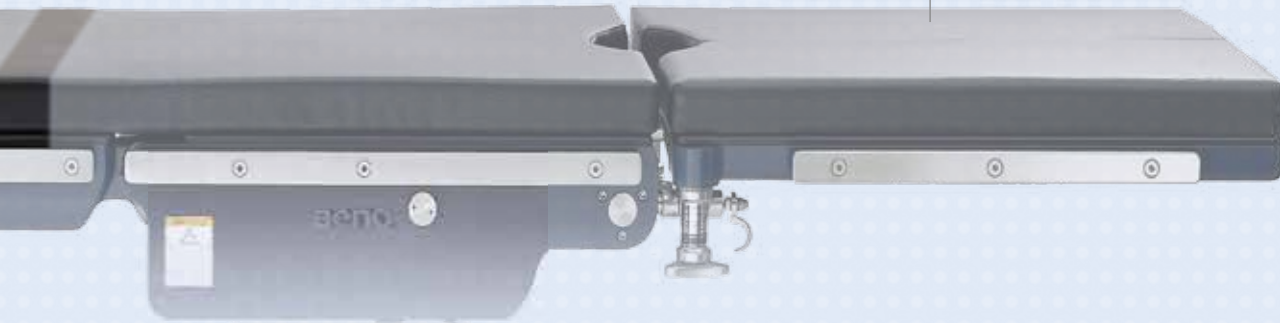

Slim Base and Column Design

offer ideal C-Arm access.

Removable Leg Section

both manual split leg plates provide easy and unobstructed perineal access.

Hand Control

All the operating table functions can be initiated with the corded hand control.

Back-up Battery System (optional)

Extended Tabletop Height Adjustment Range

from 685 to 1,135mm (27" ~ 44.7", w/o pad) can meet various specialties (7000S Series)

Emergency Override Floor Unlock Device

is an additional safe feature to manually release all floor locks.

Self-Compensating Floor Locking System

has automatic floor locking feature to provide optimum stability.

*The table shown is 7000SK with optional accessories. Please see the last page.

With our tabletop longitudinal slide feature, there is no need to reverse patient or preconfigure the table before transferring patient to achieve full-body fluoroscopic procedures.

Major Features

7000S

Provides the features of tabletop longitudinal slide and extended height adjustment range from 685 to 1,135mm (27" ~ 44.7", w/o pad). The maximum tabletop height can fully meet the demanding specialties required by CRS surgery, Hip Replacement, L-Plating for intertrochanteric Fracture, Fixation of Femoral Head in Orthopedics.

7000SK

(add to 7000S) provides the additional feature of built-in kidney bridge.

7000SPB

(add to 7000S) provides the manual override and the built-in battery.

7000S+TED-07

(add to 7000S) equip with removable orthopedic extension device to achieve perfect.

7000N

Provides the features of low tabletop height adjustment from 520 to 1,010mm (20.5 ~ 39.8", w/o pad) and tabletop 180° rotation for requirement of low height positioning needs in Neurosurgery or ENT, greater accessibility, and upper body imaging without interference of the column base.

7000NK

(add to 7000N) provides the additional feature of built-in kidney bridge.

S: Tabletop Longitudinal Slide

N: Neurosurgery Specialty

K: Built-in Kidney Bridge

B: Internal Battery Power Supply

P: Manual Override

D: two piece(spilt) design, foldable and detachable via gas spring

TED-07: Orthopedic Extension Device

Tabletop 180° Rotation of 7000N

eliminates interference between surgeon and anesthesiologist by partially (20° ~ 30°) rotating patient to the awaiting surgeon and achieves spacious leg room for seated surgeon's optimal comfort.

520mm of Low Tabletop Height Adjustment in 7000N

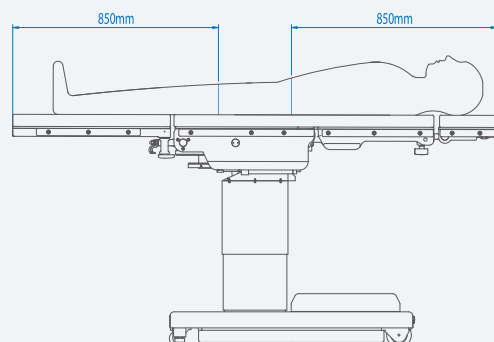

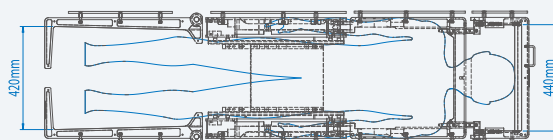

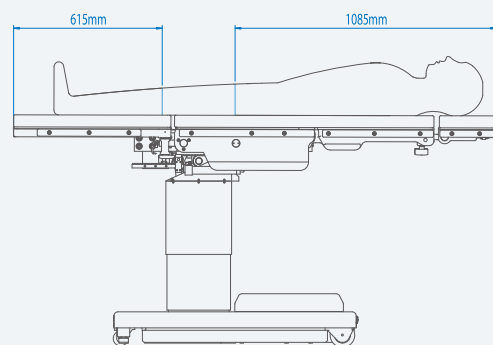

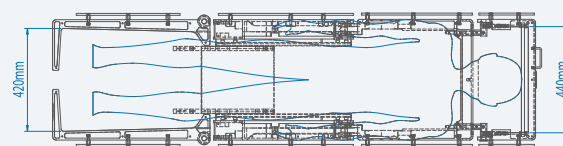

permits better maneuverability for low tabletop requirement.

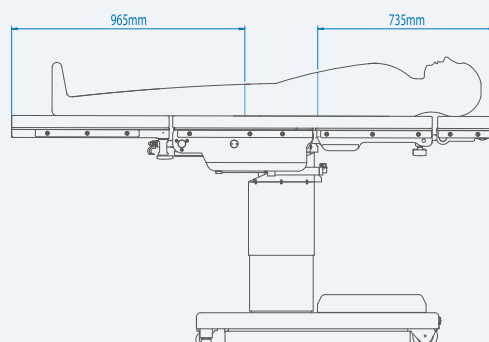

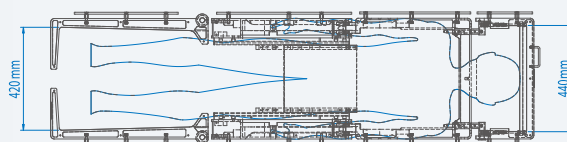

The table shown is 7000N with optional accessories.

Radiographic Coverage

Sliding toward Head-End

Sliding toward Foot-End

7000 Series ELECTRO-HYDRAULIC SURGICAL TABLES

Laparoscopy Surgery

Laparoscopic Cholecystectomy Surgery

Tabletop longitudinal slide toward head-end offers complete X-ray coverage and easy access to accommodate various surgical procedures, such as: **Laparotomy, Cholecystectomy, Herniorrhaphy, Breast Procedures, Ophthalmic Surgery, ENT Procedures.** (C-Arm courtesy of Instrumentarium)

Recommended Accessories :

- Arm Board

Chest /Abdominal Surgery

Thoracic surgery with the extension plate to position the patient chest.

Recommended Accessories :

- Arm Board x 2
- Restraint Strap x 1
- Knee Rest x 1

E.N.T. Surgery

Semi-recumbent patient or chair positions for head-neck , ENT surgery procedures, like Tonsillectomy, Cuff Repair, etc.

Gall Bladder Surgery

Thoracic, Kidney, and Gall Bladder

A combination of tabletop slide toward head-end, flex, and kidney bridge positioning provides excellent surgical site exposure and easy C-Arm access. Possible procedures includes **Nephrectomy, Ureteral Lithotomy, Total Hip Procedure, Thoracoscopy, Hiatal Hernia Repair, Lung Reduction Surgery.**

Recommended Accessories :

- Arm Board x 1
- Raised Arm Rest x 1
- Knee Rest x 1
- Head, Shoulder & Arm Rest for Lateral Positioning x 1

Rectal Surgery

Rectal positions with Knee Rest and Rectal Positioning Support to support the patient in a kneeling position

Recommended Accessories :

- Arm Board x 2
- Rectal Positioning Support x 1
- Knee Rest x 1

Lithotomy bladder Surgery

configuration of perineal cutout, lithotomy legholders and leg section, provides excellent gynecology and abdominal surgical access. Multi-position legholders can be used as leg support when the pelvis needs to be stabilized.

Recommended Accessories :

- Arm Board x 2
- Lithotomy Holder x 2

7000 Series ELECTRO-HYDRAULIC SURGICAL TABLES

for Urology

Reverse Patient Orientation for Urology

OB/GYN, Urology, and Cystoscopy

The longitudinal slide toward foot-end and slid reverse to head-end for offers comfortable patient access and complete C-Arm coverage of lower body. Tabletop can be interchanged to accommodate specific procedures like: **D & C, Cervical Conization, Pelviscopy, Cystoscopy, A-P Repair, Urinary Tract Procedures, Transurethral Resection, Rectal Surgery, Laparoscopy.**

Recommended Accessories :

- Arm Board x 2
- Leg Crutch x 2
- Urology Drain Tray for Reverse Patient Orientation x 1
- Contamination Bucket x 1

for OB/GYN

Urology /OB/ Gynecology procedures Surgery

Recommended Accessories :

- Arm Board x 2
- Leg Crutch x 2
- Urology Drain Tray Set for 7000S/SK only x 1
- Contamination Bucket x 1

Ophthalmological and Facial/Plastic Surgery

ENT, Ophthalmological, and Facial/Plastic Surgery

Sinus Surgery, Ophthalmic Surgery, Stapedectomy, Tympanoplasty, Mastoidectomy, Rhinoplasty, Septoplasty, Caldwell-Luc Procedures, Laryngectomy, Adenoidectomy, Thyroidectomy.

7000N --- Recommended Accessories :

- Arm Board x 2
- Restraint Strap x 1
- Head Rest with Wrist Support x 1

Knee Arthroscopy Surgery

Knee Arthroscopy Surgery – leg in hanging position with leg holder for arthroscopy of orthopedic surgery.

Recommended Accessories :

- Arm Board x 2
- Condyle Fixation for Tibia and Fibula x 1

Cardiovascular/ Cardiothoracic

Excellent upper body visualization is greatly improved by using tabletop longitudinal slide, maximum tabletop height 1,186mm (46.7", w/ pad), and collocation with optional Extension Plate 250mm(9.8"). That is possible procedures in **Pacers, Groshong Catheter, Hickman Catheter, Mediport Insertion, Vascular Applications, Fem/Pop Bypass, Femoral Angiograms, Femoral Endarterectomies, pain management.**

Recommended Accessories :

- Arm Board x 2

7000 Series ELECTRO-HYDRAULIC SURGICAL TABLES

Spinal Surgery

Putting the patient in the prone position permits unrestricted access for the C-arm in orthograde X-ray examinations of the affected vertebrae.

Unobstructed access of C-Arm, microscope, and/or surgical team during surgery are all possible with Dr. MAX 7000 series to complete procedural and fluoroscopic versatility.

Recommended Accessories :

- Arm Board x 2
- Assembling Dorsal Operating Pad Set x 1

Neurosurgery

Tabletop 180° rotation, low height tabletop, and full back up position in 7000N are suitable for a seated surgeon to perform various specialties in Neurosurgery with Multipurpose head support . Possible procedures in **Craniotomy, Cervical Surgery.**

Recommended Accessories :

- Arm Board x 2
- Restraint Strap x 1
- General Purpose U-type Head Rest x 1
- Neuro Adaptor for Mayfield Head Rest x 1

Total Hip Surgery

X-Ray Imaging Total Hip Treatment Surgery

Treatment of fractures of the surgery total pelvis, hip, and femoral neck; unrestricted use of image intensifier from the anterior-posterior to the lateral view.

Recommended Accessories :

- Arm Board x 1
- Raised Arm Rest x 1
- Restraint Strap x 1
- Knee Rest x 1
- Head, Shoulder & Arm Rest for Lateral Positioning x 1

Total Shoulder/Arthroscopy Surgery

Chair Position Shoulder Procedures Surgery

The full back up position with Shoulder surgery module provides access for **Breast, Acromioplasty, Rotator Cuff Repair, Total Shoulder, Abdominoplasty procedures.**

The module specially designed for procedures at the shoulder ensures direct and unrestricted access to the surgical area and eliminates any hindrance of the C-arm. The two side sections in this three-part plate can be removed and moreover, the head support can be swung to the left and right .

Shoulder Operation

This unique accessory is available for Trident's surgical tables.

Shoulder Operation offers unobstructed superior access

- Easily removed large cut-out back rest for excellent surgical access.
- Head support provides excellent fixation for head and neck.
- Head support is adjustable (height and rotation) to position patient in place.

Recommended Accessories :

- Raised Arm Rest x 1
- Restraint Strap x 1
- Lateral Support x 1
- Shoulder Surgery Attachment x 1

Dr. MAX 7000 Series in Orthopedic Procedures

Femoral Stem Fracture and Other Orthopedic Procedures

The table can be equipped with optional Removable Orthopedic Extension Device 2100-0000-0038 to have positioning flexibility of an orthopedic surgical table for procedures such as: Total Hip Replacement, Itramedullary Nailing of Femoral, and Tibia and Fibula Surgery, AO Technique

Orthopedic/Traumatologic Surgery

The Extension device allows stable positioning of injured lower extremities while applying orthopedic longitudinal traction.

Recommended Accessories :

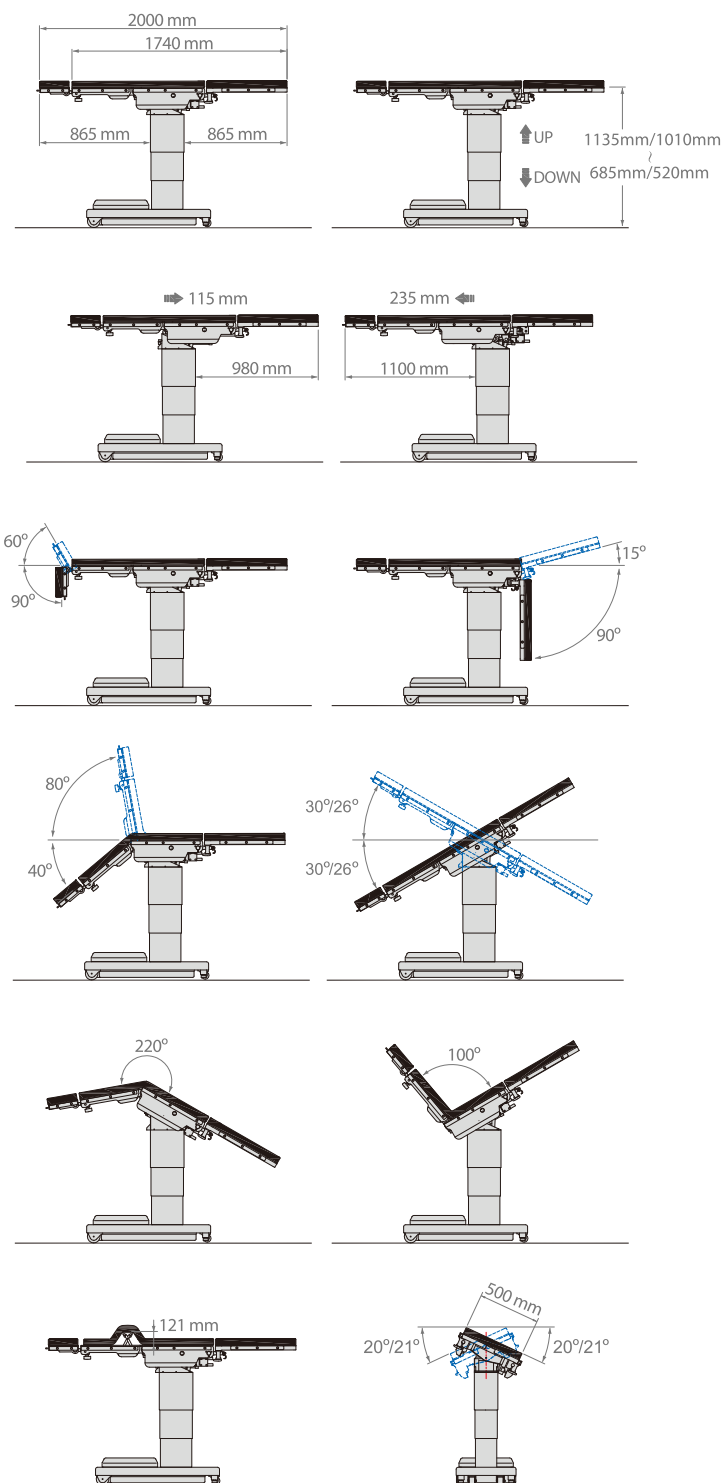

- TED-07 Orthopedic/Traumatological Extension Device x 1

Technical Specifications

Model	Dr. Max 7000 S Series	Dr. Max 7000 N Series
Tabletop Length (w/ Extendable head Rest)	2,000 mm	
Tabletop Width (w/o Side Rails)	500 mm	
Tabletop Height (Up/Down, w/o Pad)	685 ~ 1,135 mm	520 ~ 1,010 mm
Trendelenburg/Reverse Trendelenburg	30° / 30°	26° / 26°
Lateral Tilt (L/R)	20° / 20°	21° / 21°
Flex/Reflex	220° / 100°	
Head Rest (Up/Down)	60° / 90°	
Back Plate (Up/Down)	80° / 40°	
Leg Plates (Up/Down) & Horizontal Positioning	15° / 90°, Horizontal 0° ~ 90°	
Tabletop Longitudinal Slide	350 mm	NA
Table Rotation	NA	180°
Max-patient Weight	273kg	227kg

Dr. Max 7000 Series models

Functions	Description	Dr. Max 7000 S Series	Dr. Max 7000 N Series
S	Longitudinal slide is 350 mm.	●	
N	Tabletop height (Up/Down, w/o Pad) is 520 ~ 1,010 mm		●
K	Built-in kidney bridge can offer max 121mm elevation	●	●
B	DC powered system to supply about 80-100 operations during a power outage.	●	●
P	"Manual override located on the base that enables full use of the table in the even of power or built-in battery failure. Functions including Table up/down ; Trend /Rev. Trend ; Slide to head / to foot ; Floor lock / unlock ; Tilt left / right ; Back up / down."	●	
D	Dual pieces gas spring for adjusting leg section can(Up/Down) from 30° ~ 90° & horizontal positioning separate from 0° ~ 90°	◎	◎
TED-07	Orthopedic Extension Device F07 (TED-07) can offer 1,050 ~ 1,630mm adjustable range, & 225mm traction stroke.	◎	

● means optional functions.

◎ can only choose one function individual.

ACCESSORIES

Standard Accessories

- Anti-static Pad for 7000 series
- Arm Board, 2 pieces, with integral quick disconnect side rail clamp design to facilitate installation and removal.

Optional Accessories for Arm Support

- Raised Arm Rest *
- Microscopic Operating Frame for Hand
- Left Wrist-Side Gripping Handle
- Right Wrist-Side Gripping Handle
- Head, Shoulder & Arm Rest for Lateral Positioning
- Wristlet

Optional Accessories for Body Support

- Lateral Support **
- Shoulder Support **
- Pad-Adjustable Dorsal Operation Frame
- Rectal Positioning Support

Optional Accessories for Leg Supports and Urology

- Leg Crutch *
- Lithotomy Holder **
- Right Foot Rest **
- Left Foot Rest **
- Knee Rest ***
- Urology Drain Tray Set for 7000S/SK only
- Urology Drain Tray Set for 7000N/NK only
- Urology Drain Tray Set for 7000SF/SKF with Traction Device only
- Contamination Bucket

Optional Accessories for X-Ray

- X-Ray Top for 7000 series
- Lateral Cassette Holder **

Optional Accessories for General Accessories

- Anesthesia Screen Frame **
- Anesthesia Screen Frame (Adjustable) **
- Side Rail Clamp
- Side Rail Lock
- Accessory Cart

- Instrument Tray *
- Patient Transfer Device
- Restraint Strap
- Hand Control Bracket
- Head Rest with Wrist Support
- Shoulder Surgery Attachment

Optional Accessories for Neurology

- General Purpose U-Type Rest
- Neuro Adaptor, for Mayfield head Rest

Optional Accessories for Orthopedic-TED-07

- Removable Orthopedic Extension Device (TED-07) with Accessories and Cart for 7000S series only
- TED-07 Leg Plate (Left)
- TED-07 Leg Plate (Right)
- TED-07 Clamp for Leg Plate (Left)
- TED-07 Clamp for Leg Plate (Right)

Optional Accessories for Table Control

- Corded Hand Control for 7000N/NK
- Corded Hand Control for 7000S/SF/SK/SKF
- Auxiliary Control for 7000 series
- Foot Control for 7000N/NK
- Foot Control for 7000S/SF/SK/SKF

* A side-rail clamp is required to fixate the accessories and they are sold separately.

** A side-rail lock is required to fixate the accessories and they are sold separately.

*** Two side-rail lock are required to fixate the accessories and they are sold separately.
